Web Scraping Assignment: Country Codes Data

Website URL:

https://countrycode.org/

Assignment Objective

The objective of this assignment is to practice **web scraping techniques** by extracting structured data from a real-world website. Students will scrape **country related information** from *CountryCode.org* and store it in a structured format for further analysis.

Task Description

Students are required to:

1. Visit the website: https://countrycode.org/
2. Identify the **HTML table(s)** containing country information.
3. Use **Python web scraping techniques** to extract the data.
4. Convert the scraped data into a **pandas DataFrame**.
5. Save the extracted data into a **CSV file**.
